

Stage 1: What is my primary objective?

Reproduction

Reproduce the paper's model, selected features, or reported results.

Assessment

Verify or validate a model, test a mechanism or hypothesis, or assess agreement with evidence.

Application

Use, adapt, or extend the paper's model, mechanism, or method for my own scientific question.

Stage 2: What depth of work do I need?

Model Level

Implement, adapt, or check the required computational model or method.

Claim Level

Test a selected scientific claim, proposed mechanism, or hypothesis.

Result Level

Reproduce, compare, or generate specific curves, tables, or numerical results.

Choose one objective and one depth; any combination is allowed.
